

Resource

A Quarterly Newsletter for Referring Physicians of Reverence Home Health & Hospice

Summer 2014 / Vol. 1 • No. 1

Dear Provider-

Welcome to the inaugural issue of Reverence Resource, a quarterly provider newsletter designed to provide relevant information about Reverence home health, hospice and infusion services available within our statewide company, which can benefit you and your patients. As always, please let us know if we can be of further assistance in meeting your patients' home care needs!

Linda Young

Linda Young, President
Reverence Home Health & Hospice

Wound Management Overview

Reverence Home Health & Hospice statewide wound care program has certified wound care nurses available for consultation. Our procedure on wound treatment and a streamlined documentation system allows the certified wound care nurse access to assess the patient remotely, allowing quicker intervention and communication to physicians. Reverence has aligned policies and procedures for wound care treatments which reflect best practice and support wound management principles. To encompass a holistic approach to wound healing and improve patient outcomes, we also offer social work, physical and occupational therapy, and a dietitian.

For more information about the wound care program or to make a referral, call Reverence Home Health & Hospice at 888-2-HOMECARE (888-246-6322).

Referrals made easy!

We offer three options to refer a patient to Reverence Home Health & Hospice:

- Online:** www.ReverenceHomeHealth.org – click on the “Health Professionals” link at the top of the page to enter or upload your referral
- Phone:** 888-2-HOMECARE (888-246-6322)
- Fax:** 877-561-7891

Welcome, Genesys Hospice

On July 1, Genesys Hospice transitioned to Reverence Home Health & Hospice, which allows a more consistent and effective care delivery platform. As part of the Reverence statewide model, we are now well positioned to standardize protocols and implement best practices to provide your patients the highest standard of care. Please know there are no changes in the way that you refer a patient for care in the Genesys service area.

Reverence infusion services expands

Reverence Home Health & Hospice now provides infusion services in three of our markets: Genesys Health System, St. Mary's of Michigan and St. John Providence Health System. Our infusion services include pharmaceutical infusion administration in the comfort of the home environment. Registered pharmacists provide Pharmacokinetic dosing and monitoring, and supervise the compounding of all pharmaceuticals. Our nurses work with the referring physician to provide individualized care.
